### **FOR IMMEDIATE RELEASE**

#### **SMARTCOVER<sup>®</sup> Prevents 1000<sup>th</sup> Sewer Spill**

ESCONDIDO, CA – Hadronex, Inc. announced today that its SmartCover<sup>®</sup> sewer monitoring product reached its 1000<sup>th</sup> spill saved. On December 26th the city of South Gate, California received a high water level alarm from one of its SmartCover<sup>®</sup> instrumented manhole covers indicating a sewer blockage in the line. Upon investigating the alarm city crews found a blockage that took three hours to clear. The SmartCover<sup>®</sup> not only prevented a sewer spill with the accompanying clean up costs and mess but also a potential fine. Even more critical is the fact that the SmartCover<sup>®</sup> prevented serious damage to two houses which were at the location. David Torres, Field Operations Manager for the City of South Gate said, “Thanks to the installation of The SmartCovers throughout the City, we were able to avoid a costly Sanitary Sewer Overflow that could have resulted in damage to private property, fines, and environmental issues had it reached a Storm Drain.”

The SmartCover<sup>®</sup> was introduced by Hadronex, Inc. in early 2006. The small, self contained unit fits easily underneath any manhole cover and provides real time monitoring of the water level with wireless alarm notification. The unit sends alarms to agencies of potential sewer spills by providing early notification of rising water. SmartCover<sup>®</sup> also supports Hadronex' Sewer Intelligence<sup>®</sup> option which is used for sewer system optimization. SmartCover<sup>®</sup> is deployed by water agencies across the United States. SmartCover<sup>®</sup> has won several awards from the water industry as well as cities and high tech organizations.

#### **About Hadronex, Inc.**

Hadronex is an environmental company that manufactures products for the Water and Wastewater industry. The Hadronex SmartCover<sup>®</sup> has become the industry standard for water level monitoring to prevent sanitary sewer overflows. Hadronex is located in Escondido, California and has Dealers and Representatives across the U.S.
